To Whom It May Concern,

As a passionate Computer Engineer, I read your posting with much interest. My experience fits with the qualifications you are seeking at SpaceX and I am sure that I would make a valuable addition to your team and company.

With 25 months' experience as a Computer Engineer (Co-op), I am a very enthusiastic worker with many skills and a lot of exposure to programming both in the corporate environment and on a small team. My classroom, professional, and personal experiences have endowed unto me a well-rounded skill set, and, as an Eagle Scout, I have demonstrated my work ethic by appearing on the Dean's list 5/6 semesters thus far.

In addition to my experience and personal qualities, I have a solid and on-going educational foundation from the University of Cincinnati as well as a formidable passion for computers in all facets of the science. I am very enthusiastic about the position's opportunity for travel and would welcome the opportunity to contribute to your ongoing successes.

Most of my experience thus far has been in software, both personal and professional, however I am very interested in hardware and leadership and would love to take on any opportunity which would give me any exposure to or experience in either. My current interests are primarily directed at embedded system design and development.

Please review my attached resume for additional details regarding my expertise and career achievements. Also feel free to view my e-portfolio at **kmfarley11.github.io** for more of my background and technical information. Please do not hesitate to get in touch with me; I would be more than happy to discuss how my experience and background meet your needs.

Thank you for your time and consideration.

Sincerely,

Kevin Farley
